

Calendar User Documentation Draft #1

Introduction:

Basic Calendar widget that displays the current month, with an interface that can choose the current date and display the day's holiday, an interactive list of tasks, and a daily quote/thought.

Supported browsers: Chrome, Firefox, Safari;

Main Features:

Calendar (left-half)

A typical display of the current month and year on the top left; below will be a grid of the days of the week with their corresponding dates below. The current date will be chosen/highlighted by default. The user can hover and click on any date to see its events.

Chosen Date Menu (right-half)

Upon clicking a certain date on the calendar, the right side of the screen will display the current day/date at the top, any official holidays below that, a task list following the holidays (if there are any) - which can be modified by a '+' 'plus' button on the right, and finally a randomly chosen inspirational quote as the daily thought below.
